## Important News

PDO aims to maintain a safe and healthy working environment by correcting situations that caused or could likely cause injury or damage. When an incident occurs, it is important to report the occurrence so corrective actions could be taken to make sure that a similar or more serious incidents do not re-occur. An incident is defined as “an unplanned and undesired event or chain of events that have, or could have, resulted in injury or illness, damage to assets, environment, company reputation, and/or consequential business loss”. There are different types of reportable incidents:

### What You Need to Know

#### HSE Advice:

Unsafe acts/conditions  
Life Saving Rule violation  
Near misses  
A near miss is an incident sequence of events that could have resulted in injury, illness, or damage to assets, environment or company reputation, but which did not occur. Reporting a near miss is an important step in preventing incidents with consequences. Near miss incidents are gifts that enable us to learn and rectify the situation before it escalates to injuries or damages; in other words, a miss that was nonetheless

#### How to report a near miss?:

Normally, staff are good in reporting incidents. However, potential near miss incidents are reported by staff before it escalates to injuries or damages.

#### Who reports a near miss?:

- Mechanical seal leaks
- Momentary fire APCU and valve stand due to report including visitors to PDO.
- Failure of the Blanketing process to valve again fix of tanks resulting in blow hatch valve popping.
- Hi-Hi level at tanks failed and resulted liquid carry over to flare knock out vessel and trip station.
- Hi-Hi level at Bulk/Test Separators failed and resulted liquid carry over to flare knock out vessel and trip

Loss prevention pyramid

There are many examples of what could be considered as a near miss such as:

- Someone trips on uneven pavement while walking. Being agile and empty handed, that person regains balance with no harm done.
- You stumble because of an uncovered hole outside of a building but you don't fall.
- A projectile hits your safety glasses but does not injure your eye.
- An object falls near you and did not hit you.

There are other examples related to process safety near miss incidents such as:

## WORKING FOR YOU TO KEEP YOU SAFE

### HSE Advice Note

#### What you need to know?

##### Why to report a near miss?

- Enables companies to pro-actively control/eliminate hazards before a tragic or costly incident occurs.
- Engages the workforce at all levels in solving problems.
- Increases safety ownership and reinforces workers' self-esteem.
- Uncovers valuable information that otherwise might not be identified.
- Develops a positive safety culture.

There might be elements to prevent people from reporting near miss incidents such as difficulty to report the incident, bureaucracy in terms of paperwork, loss of reputation by reporting many incidents. It has to be clear that PDO interest to receive near miss reports is to create a safer and healthier working environment.

That is why a new [Near Miss Reporting](#) template was developed and introduced to the organization. The template is web-based and can be accessed by all staff including contracting community. Reporting staff can be anonymous as only essential details are needed to act on the incident.

#### Who reports a Near Miss?

All are encouraged and requested to report including visitors to PDO. If you don't have access to the web, then please ask a colleague or a supervisor to report on your behalf.

#### How to report a near miss?

PDO staff have the option to either enter the incident directly to PIM or go to <https://web.pdo.co.om/hsetool/nearmiss/nearmiss.aspx>; this link is accessible by everyone including contractors with internet access.
