Important News

PDO aims to maintain a safe and healthy working environment by correcting situations that caused or could likely cause injury or damage. When an incident occurs, it is important to report the occurrence so corrective actions could be taken to make sure that a similar or more serious incidents do not re-occur. An incident is defined as "an unplanned and undesired event or chain of events that have, or could have, resulted in injury or illness, damage to assets, environment, company reputation, and/or consequential business loss". There are different types of reportable incidents:

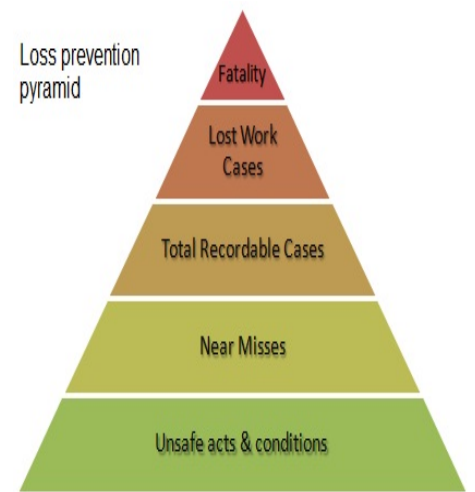

What You Need to Know

What you need to know?

• Unsafe acts/conditions
• Life Saving Rule Violations
• Near misses
A near miss incident is an unplanned event that did not result in injury, illness, or damage to assets, environment or company reputation, but had the potential to do so. Reporting near miss incidents is important as reporting incidents can help prevent future incidents. Near miss incidents have different consequences. Only a fortunate break in the chain of events prevented an injury, fatality or damage; i.e. a miss that was nonetheless very

How to report a near miss?

Normally, staff are good in reporting incidents. However, as incidents are reported, they are rectified to prevent further incidents.

There are many examples of what could be considered as a near miss such as:

- Someone trips on uneven pavement while walking. Being agile and empty handed, that person regains balance with no harm done.
- You stumble because of an uncovered hole outside of a building but you don't fall.
- A projectile hits your safety glasses but does not injure your eye.
- An object falls near you and did not hit you.

There are other examples related to process safety near miss incidents such as:

Who reports a near miss?

- Mechanical seal leaks
- Momentarily the AP, LP and HP control valve failed and requested to report to P.D.O.
- Failure of the blanketing gas valve in the fix foot tank, resulting in blow down valve popping.
- Hi-Hi level at tanks failed and resulted liquid carry over to flare knock out vessel and trip station.
- Hi-Hi level at Bulk/Test Separators failed and resulted liquid carry over to flare knock out vessel and trip station.

WORKING FOR YOU TO KEEP YOU SAFE

HSE Advice Note

Why to report a near miss?

- Enables companies to pro-actively control/eliminate hazards before a tragic or costly incident occurs.
- Engages the workforce at all levels in solving problems.
- Increases safety ownership and reinforces workers' self-esteem.
- Uncovers valuable information that otherwise might not be identified.
- Develops a positive safety culture.

Who reports a Near Miss?

There might be elements to prevent people from reporting near miss All are encouraged and requested to report including incidents such as difficulty to report visitors to PDO. If you don't have access to the web, then please ask a colleague or a supervisor to report on your behalf.

reporting many incidents. It has to

How to report a near miss?

be clear that PDO interest to receive near miss reports is to PDO staff have the option to either enter the incident directly to PIM or go to

<https://web.pdo.co.om/hsetool/nearmiss/nearmiss.aspx> create a safer and healthier working environment.

That is why a new [Near Miss](#) ; this link is accessible by everyone including

[Reporting](#) template was developed and introduced to the organization.

The template is web-based and can be accessed by all staff including contracting community. Reporting staff can be anonymous as only essential details are needed to act on the incident.
